TYPO3.Neos - Bug # 38544

Status:	Resolved	**Priority:**	Must have
Author:	Adrian Föder	**Category:**	TypoScript
Created:	2012-07-02	**Assigned To:**	Karsten Dambekalns
Updated:	2013-04-10	**Due date:**	
Subject:	Unit test for TypoScript\Processors\DateProcessorTest::dateBasicallyWorks fails		

Description

Time: 1 second, Memory: 5.50Mb

There was 1 failure:

1) TYPO3\TYPO3\TypoScript\Processors\DateProcessorTest::dateBasicallyWorks
The TypoScript processor "date" did not return the expected result while
converting a UNIX timestamp. Expected "July 24, 2007, 2:25 pm" but got
"July 24, 2007, 12:25 pm"
Failed asserting that two strings are equal.

[!!!][BUGFIX] TypoScript date processor adjusted to correct time zone handling

With its former implementation the Date processor of TypoScript relied
strictly on the system's time zone, which is incorrect when
parsing Unix timestamps because these are per design GMT+00:00.

However, if desired, a timezone correction can be applied with a provided
setTimezone setter method.

This change is considered breaking because having relied on the behavior
(i.e. taking system timezone into account) would change the expectation now.

Works for (hehe) - what timezone is your PHP using?

#2 - 2012-07-26 14:43 - Adrian Föder

hah sorry; I seldom realize that there is a feedback needed from me; I use (hehe) UTC ;-)
