Subject:	Make TypoScript usable outside the context of TYPO3 / Nodes, but also for building extensible FLOW3 applications		

Description

For the management view in the Phoenix backend, we want to use TypoScript for the generic and extensible rendering mechanism.

Thus, we want to investigate the changes to be done in TypoScript to make it usable in the context of generic objects. We planned the new TypoScript in a way that this is possible; though we still have to connect some loose ends for good usability.

See the subtasks for some detailed TODOs.

Subtasks:

Feature # 38630: Implement TypoScriptView which can be used as replacement of Fluid Tem...	**Resolved**
Bug # 38631: Make use of FlowQuery explicit by introducing a wrapper function "q" (for ...	**Resolved**
Feature # 38633: Make TypoScript Context multi-valued	**Resolved**
Task # 38634: Move TypoScript Processors from TYPO3 to TypoScript Package	**Closed**
Feature # 38636: Implement get() function to retrieve arbitrary objects via ObjectManager	**Rejected**
Feature # 38638: Introduce PresentationModel Wrapper in eel expressions in order to app...	**On Hold**
Bug # 38692: FluidTemplate: Make Layout and PartialPath settable	**Resolved**
