

TYPO3.TypoScript - Feature # 38636

Feature # 38629 (Resolved): Make TypoScript usable outside the context of TYPO3 / Nodes, but also for building extensible FLOW3 applications

Status:	Rejected	Priority:	Should have

Subject:	Implement get() function to retrieve arbitrary objects via ObjectManager		
Description	<p>At some points during rendering of standalone FLOW3 applications, it would be very helpful to access global state, by accessing singleton objects.</p> <p>For instance, for the Blog example it would be helpful if the current blog could be fetched using TypoScript.</p> <p>One way to do this would be <code>#{get('TYPO3\Blog\Domain\Repository\BlogRepository').getActive()}</code>, or possibly also <code>@#{blogRepository.active}</code></p> <p>Note that this feature still needs to be discussed thoroughly; I am not sure if w really want that</p>
