

## TYPO3.Flow - Bug # 38662

<b>Status:</b>	Closed	<b>Priority:</b>	Must have
<b>Author:</b>	Adrian Föder	<b>Category:</b>	MVC
<b>Created:</b>	2012-07-05	<b>Assigned To:</b>	Adrian Föder
<b>Updated:</b>	2012-07-05	<b>Due date:</b>	
<b>PHP Version:</b>			
<b>Has patch:</b>	No		
<b>Complexity:</b>			
<b>Affected Flow version:</b> FLOW3 1.1.0 rc 1			
<b>Subject:</b>	Media type not supported should throw 415 rather than 406		
<b>Description</b>			
In the AbstractController there's a check for supported media types. If this does not match, currently a 406 is thrown but should be 415.			

### History

#### #1 - 2012-07-05 09:58 - Gerrit Code Review

- Status changed from New to Under Review

Patch set 1 for branch **master** has been pushed to the review server.

It is available at <http://review.typo3.org/12620>

#### #2 - 2012-07-05 10:00 - Adrian Föder

- Subject changed from Nedia type not supported should throw 415 rather than 406 to Media type not supported should throw 415 rather than 406

#### #3 - 2012-07-05 11:35 - Karsten Dambekalns

While this may be more intuitive, it is wrong. From <http://stackoverflow.com/questions/3294483/http-406-and-415-error-codes> comes this nice explanation:

- 406 is returned by the server when it can't respond based on accepting the request headers (ie they have an Accept header which states they only want XML).
- 415 is returned by the server when the entity sent in a request (content in a POST or PUT) has an unsupported mediatype (i.e. they sent XML).

so.. 406 when you can't send what they want, 415 when they send what you don't want.
