TYPO3.TypoScript - Feature # 38696

Status:	Resolved	**Priority:**	Should have

Subject:	Extend TypoScript syntax		

Description

DOES NOT WORK (probably)

    1.wrap(before: ${"foo" + blah.blubb})

We should support un-named arguments in processors, so one can write:

    1.wrap("foo|bar")

see http://groovy.codehaus.org/Extended+Guide+to+Method+Signatures - chapter Named Arguments for inspiration

Is this still necessary with the interoperability changes?

- Status changed from New to Resolved

Not needed anymore. Works nicely with EEL expressions.
