Is Regression:	No				
Sprint Focus:					
Subject:	Make use of jQuery also for the action icons				
Description					
<p>Currently when you click on an action button the click event is propaganated to the parent container which makes the irre element collapse or expand.</p> <p>The action icons need to be refactored to not use onclick="" handlers but real jQuery event callbacks where the propagation is stopped to avoid the collapse/ expand.</p>
