Complexity:	easy
Sprint Focus:	
Subject:	Swap doc header rows in all backed modules

Description

The contents of the do headers need to be adjusted.
Module relevant things (like the submodule switch) should be on top while the content related things (save icon for example) should be in the second row - near the content.

Missing do headers should be added to the modules lacking them...

[FEATURE] Swap doc header rows in all backend modules

Swaps all docHeader rows for the backend modules.

Function menu and CSH are moved to the top row while
buttons (save, close and shortcut) are moved underneath.

Also includes a compatibility layer for non-core legacy

These non-standard docHeaders are reformated by CSS.
To deliver fall-back logic the HTML structure was redefined.
