[BUGFIX] Adjust styling and reposition form buttons

With this change the setup uses the default markup for modals see <http://twitter.github.com/bootstrap/javascript.html#modals>

That comes with more space for the content and some clever floating / responsive design tricks for smaller screens.

Besides this slightly adjusts the order of buttons to be more intuitive ("back" on the bottom left, "skip" and "next" on the bottom right).

Lastly this changes the setup form preset name from "setup" to "typo3.setup" to avoid conflicts with 3rd party code.

Fixes: #38856

Fixes: #38857

#### Revision bac4e3c8 - 2012-07-11 16:33 - Aske Ertmann

[TASK] Fix some styling issues and use modal dialog for errors

- Remove bottom margin from h3 to fix height of modal header
- Remove bottom margin from form to fix overflow of modal footer
- Add word-break to code tags to avoid horizontal scrolling
- Add margin to body so the redirect message looks good
- Include Twitter Bootstrap css before setup css
- Use modal layout for error messages
- Add missing titles for errors thrown about php executable/version
- Add versions numbers to version comparison error message
- Move jQuery to top of page to avoid inline JS breaking
