<b>PHP Version:</b>			
<b>Has patch:</b>	No		
<b>Complexity:</b>			
<b>Subject:</b>	Add a signalslot before compilation		
<b>Description</b>			
<p>I think it would be nice to have a signalslot before compilation. Currently there is only a signalslot when compilation is finished successfully.</p> <p>The compileCommand in the CoreCommandController could look like this:</p> <pre>public function compileCommand(\$force = FALSE) {     \$objectConfigurationCache = \$this-&gt;cacheManager-&gt;getCache('FLOW3_Object_Configuration');     if (\$force === FALSE) {         if (\$objectConfigurationCache-&gt;has('allCompiledCodeUpToDate')) {             return;         }     }      \$this-&gt;emitStartCompilationRun(); //THIS IS NEW      \$classesCache = \$this-&gt;cacheManager-&gt;getCache('FLOW3_Object_Classes');     \$this-&gt;proxyClassCompiler-&gt;injectClassesCache(\$classesCache);      \$this-&gt;aopProxyClassBuilder-&gt;injectObjectConfigurationCache(\$objectConfigurationCache);     \$this-&gt;aopProxyClassBuilder-&gt;build();     \$this-&gt;dependencyInjectionProxyClassBuilder-&gt;build();      \$classCount = \$this-&gt;proxyClassCompiler-&gt;compile();      \$objectConfigurationCache-&gt;set('allCompiledCodeUpToDate', TRUE);      \$classesCacheBackend = \$classesCache-&gt;getBackend();     if (\$this-&gt;bootstrap-&gt;getContext()-&gt;isProduction() &amp;&amp; \$classesCacheBackend instanceof FreezableBackendInterface) {         \$classesCache-&gt;getBackend()-&gt;freeze();     }      \$this-&gt;emitFinishedCompilationRun(\$classCount); }</pre> <p>In our solution we wan't to do some stuff before the flow3 compiler kicks in</p>
