[BUGFIX] Pagetree filtering crashes on draft moves

This bugfix fixes the following pagetree issues encountered in a draft workspace:

1. Records moved in draft could not be found
2. Pagetree would crash if a moved page occurs in the rootline of a filtered page.
3. Filtering only looked at live page title not the draft title

Steps to reproduce all three forms of misbehavior:

1. Create two pages A & B and add a subpage C to B.
2. In a draft workspace move B inside A.
3. Search for C in the pagetree filter -> error
4. Search for B in the pagetree filelet -> no result
5. Rename A to X.

6. Search for X -> no result
