Updated:	2012-07-30	**Due date:**	
Subject:	TransportFactory does not set all options		
Description			

The TransportFactory currently uses method_exists() to find out whether an option is settable on the factory.
Unfortunately this does not work because SwiftMailer uses magic methods to set some of those.
It's currently not possible to set **username** and **password** for the SmtpTransport!

[BUGFIX] TransportFactory does not set all options

The TransportFactory currently uses method_exists() to find out
whether an option is settable on the factory.
Unfortunately this does not work because SwiftMailer uses magic
methods to set some of those.

This change uses FLOW3s reflection service to figure out settable
options.
