Sprint Focus:			
Subject:	Cannot delete record moved in draft		
Description			
In a draft workspace:			
1. Create two pages A + B and move B into A.			
2. Delete B.			
3. You will now see B twice, once at the old location and once inside A.			
The point is that the draft element is deleted, but the move-to placeholder remains and is shown as a real record.			
Hold for 4.5 up till 6.0

Case II:

When the original record is removed in the live workspace, then the placeholder also remains and becomes visible.

Testplan:

- Create a new record "foo" in live workspace on a page where already a record exists
- switch to a workspace
- move the new record "foo" on the page (this will create a placeholder and a move placeholder in the database)
- switch back to the live workspace
- delete the record "foo"
- switch back to the workspace where you have moved the record

Current result:

- The move placeholder is shown in the page

Expected result:

- The record should be removed completely
