Resolves: #39468

### History

**#1 - 2012-08-02 18:10 - Francois Suter**

- Project changed from Documentation to TypoScript Reference (TSref)

**#2 - 2012-08-02 18:12 - Francois Suter**

Note that the parameters must not be removed entirely from the TSref. They must just be marked as removed as of TYPO3 6.0. They must be left so that the documentation can still be used for older versions.

**#3 - 2012-08-03 17:01 - Chris topher**

- Subject changed from Tsref: Remove all config.stat\* parameters to Mark all config.stat\* parameters as removed

- Target version set to 6.0

**#4 - 2012-10-22 14:45 - Chris topher**

- Tracker changed from Bug to Task

- Subject changed from Mark all config.stat\* parameters as removed to Mark all config.stat\* options as removed

**#5 - 2012-10-22 17:50 - Chris topher**

In the API in typo3\sysext\frontend\Classes\Controller\TypoScriptFrontendController.php some of the stat\* options were deprecated, but are still mentioned. However, all the functions to actually write the results to logfiles have been removed, so that these options on its own won't work any more and TSref does not document extensions (which in that case would make use of deprecated stuff and also should stop doing so btw).
