| <b>Description</b>   |  |                     |                     |
| <p>In TypoScript, very often lines like the following are used:</p>            |  |                     |                     |
| <pre>foo = Text foo {     ... }</pre>  |  |                     |                     |
| <pre>foo &lt; bar foo {     ... }</pre>  |  |                     |                     |
| <p>We propose a "Condensed Confinements" syntax, so one can write instead:</p> |  |                     |                     |
| <pre>foo = Text {     ... }</pre>  |  |                     |                     |
| <pre>foo &lt; bar {     ... }</pre>  |  |                     |                     |

[FEATURE] Support "condensed confinements" to reduce typing overhead

With this change, we extend TypoScript confinements such that they can happen at the end of an assignment line.

Example before:

```
foo = Text
foo {
    ...
}
```

```
foo < bar
foo {
    ...
```

```
}
```

Example now: (the old syntax is of course still valid)

```
foo = Text {
```

```
...
```

```
}
```

```
foo < bar {
```

```
...
```

```
}
```

Resolves: #39498
