

TYPO3.Flow - Feature # 3950

Status:	Resolved	Priority:	Should have
Author:	Robert Lemke	Category:	Package
Created:	2009-07-21	Assigned To:	Karsten Dambekalns
Updated:	2010-10-20	Due date:	
PHP Version:			
Has patch:			
Complexity:			
Subject:	Package Manager should warn about duplicate packages		
Description			
Currently it is possible to use the same package key multiple times within the Packages/* directories, for example:			
Packages/ Application/ Blog/ Framework/ Shared/ Blog/			
The behavior is undefined. We should throw an exception instead to warn about multiple occurrences of a package key.

Just a note for the future:

It should be possible to have multiple versions of a package installed. Depending on the context the right package would be chosen. E.g:

 Packages/
 Application/
 Blog/
 Development/
 Blog/

That way you could test new versions of packages before making them available in production context.

Though - until this is implemented, we really should forbid multiple installations.
