

TYPO3.Fluid - Bug # 3969

Status:	Closed	Priority:	Won't have this time
Author:	Thomas Waggershauser	Category:	
Created:	2009-07-23	Assigned To:	Jochen Rau
Updated:	2010-10-20	Due date:	
Has patch:			
Affected Flow version:			
Subject:	"Fatal error: Objects used as arrays.." with PHP 5.2.0		
Description			
<p>I spend some time now, to understand this error:</p> <p>Fatal error: Objects used as arrays in post/pre increment/decrement must return values by reference in /Users/air/Sites/typo3_src-4.3.0alpha3/typo3/sysext/fluid/Classes/ViewHelpers/Form/SelectViewHelper.php on line 148</p> <p>It seems to be a php-problem, but I don't really understand, what this has to do with references :(</p> <p>This issue occurred using php 5.2.0, after update to 5.2.9, it worked.</p> <p>-</p> <p>This is not supposed to be like this, cause TYPO3 only requires 5.2.0 IIRC.</p> <p>It's something that can be fixed quite easily, e.g. from</p> <pre>foreach (\$this->arguments['options'] as \$domainObject) {</pre> <p>to</p> <pre>\$options = \$this->arguments['options'] foreach (\$options as \$domainObject) {</pre>			

History

As far as I know this was actually a problem in some PHP releases, so an PHP update fixing this bug seems OK to me. I would not like to make workaround code for a PHP bug.

#2 - 2009-07-24 13:21 - Steffen Kamper

We considered in TYPO3 core not to make workarounds for PHP Bugs - these will be fixed in later releases anyway

#3 - 2009-07-29 17:45 - Jochen Rau

- Status changed from New to Closed
- Assigned To set to Jochen Rau
- Priority changed from Should have to Won't have this time

#4 - 2009-10-21 17:53 - Bastian Waidelich

- *Project changed from Extbase MVC Framework to TYPO3.Fluid*

- *Category deleted (432)*
