

TYPO3.Flow - Bug # 39699

Status:	Accepted	Priority:	Should have
Author:	Pablo Delgado	Category:	Cache
Created:	2012-08-11	Assigned To:	Karsten Dambekalns
Updated:	2012-12-13	Due date:	
PHP Version:	5.3		
Has patch:	No		
Complexity:			
Affected Flow version:	Git master		
Subject:	SQL DDL for TYPO3\FLOW3\Cache\Backend\PdoBackend		
Description	<p>I could not find any example or script that helped create the tables needed to use TYPO3\FLOW3\Cache\Backend\PdoBackend. It would be nice if the Backend could generate the tables needed during the execution of flow3:cache:warmup or at the very least example DDL script that developers can use to generate the tables needed.</p> <p>Here is the DDL for PostgreSQL (It may work for MYSQL with no changes)</p> <pre>create table cache ("identifier" varchar primary key, "context" varchar, "cache" text, "created" int, "lifetime" int, "content" varchar); create table tags ("identifier"varchar primary key, "context" varchar, "cache" text, "tag" varchar);</pre>		

History

#1 - 2012-08-17 11:18 - Karsten Dambekalns

- Status changed from New to Accepted
- Assigned To set to Karsten Dambekalns
- Target version deleted (1.1)

#2 - 2012-12-13 12:35 - Karsten Dambekalns

- Affected Flow version changed from Git 1.2 (master) to Git master
