

TYPO3.Neos - Task # 39806

Status:	Accepted	Priority:	Should have
Author:	Robert Lemke	Category:	Services
Created:	2012-08-14	Assigned To:	Robert Lemke
Updated:	2012-08-14	Due date:	
Subject:	Refactor user management to use central domain service		
Description	The code dealing with user creation, update and deletion is spread all over the packages. We need to centralize this in a Domain Service.		

Associated revisions

Revision ac939fde - 2012-08-14 18:03 - Robert Lemke

[FEATURE] New command: user:set password

This adds a new command which allows for setting the password of an existing user account.

The whole set of user:* commands needs to be reworked at some point, but this patch gives some quick relief for an urgently needed feature.

Revision 32cd1556 - 2012-08-15 09:35 - Aske Ertmann

[BUGFIX] Fix error when saving user in user settings/management

The error was caused by a custom form field using property instead of name.
