

Core - Bug # 39820

Status:	Resolved	Priority:	Should have
Author:	Tobias Schultheiss	Category:	Pagetree
Created:	2012-08-15	Assigned To:	
Updated:	2013-04-07	Due date:	
TYPO3 Version:	4.6		
PHP Version:			
Complexity:			
Is Regression:			
Sprint Focus:			
Subject:	unnecessary moveNode in class.t3lib_tree_pagetree_commands.php createNode()		
Description	<p>On a Typo3 4.6.10 installation i had the problem that the creation of a new page via drag&drop always timed out. A Tracking revealed that the creation of the new page took over 100 Seconds (thats pretty ugly but another issue). I finally tracked the bad Performance to the function createNode() in t3lib/tree/pagetree/class.t3lib_tree_pagetree_commands.php.</p> <p>In said function is a comparison:</p> <pre>if (\$parentNode->getWorkspaceId() !== \$targetId) { self::moveNode(\$node, \$targetId); }</pre> <p>which fails although both ids are the same. After i did a typecast to int on both of the ids, the comparison worked, the moveNode wasn't executed anymore and the duration fell to ~10 Seconds.</p>

Oh, great improvement, Tobias! Thanks a lot.

Would you like to create a patch and send this into the review workflow? see http://wiki.typo3.org/Contribution_Walkthrough_Tutorials.

If you have any trouble, just ask!

Ok, first time i used git and i got mail from mr. jenkins.
what have i done wrong?

seems i had mixed up some submodule pointers.
i made a new clone and changed the code again, this time it seems the pointers are all right.
do i just have to push the patch again?

#5 - 2012-08-19 20:57 - Steffen Gebert

Hi Tobias,

sorry, I was on holiday, but Michi Stucki should have taken over (he promised to substitute myself).
But thanks a lot for digging into Git, I appreciate it!

To upload an updated version, please include this line in the commit message:

Change-Id: I702ccb71dcf91063012eb77091f5982661ee3afd

Otherwise a new change request will be created (which wouldn't be too dramatic).

We have a Troubleshooting page in the wiki, which can help you with the submodule problems: [http://wiki.typo3.org/TroubleShooting_\(Git\)](http://wiki.typo3.org/TroubleShooting_(Git))

And here's a tutorial, how you can upload an updated patch set:

http://wiki.typo3.org/Contribution_Walkthrough_with_CommandLine#Improving_the_patch_and_uploading_a_new_Patch_Set

If I can help you, please post again. Will be available the next days!

Steffen

Hi Steffen,

thanks for the resources and your assistance/comments (inspired me to share ... although i had to wait for the answer; I begrudge anyone his vacation), I think I managed to push it now correctly.
