Sprint Focus:	
Subject:	Not possible to save edited files in fileadmin (TYPO3 6.0 Alpha3)

Description
I'm using TYPO3 6.0 Alpha3 as an admin user. First I created a html file in fileadmin which works fine. After that I edited the file and tried to save it by using the save button. With t3editor I get the alert message "[object Object]". With deactivated t3editior I get the error message "1: You are not allowed to edit files!"

Revision cfd10726 - 2012-09-16 16:02 - Andreas Wolf

[BUGFIX] Files contents cannot be changed

Setting file contents failed for two reasons:

a) The permissions were incorrectly read from TSconfig and

b) We used a new "update" permission that was not present
   in the default configuration, so without manually setting it,
   a file could never be updated, even by admins.

This commit changes the "update" permission back to "edit", which was
also used in the pre-FAL era.

It has nothing to do with permissions. I've tried it with 777.

#2 - 2012-08-20 01:00 - Michael Stucki

- Category set to File Abstraction Layer (FAL)

- Complexity set to medium

#3 - 2012-09-01 15:54 - Andreas Wolf

The error "You are not allowed to edit files" is fixed with the patch for #37812.

The other error (for the AJAX call) seems to be related to T3Editor. I got the following message from the server:

    <t3err>No backend function registered for ajaxID "T3Editor::saveCode::saveCode".</t3err>
