Updated:	2013-04-11	**Due date:**	

PHP Version:	
Has patch:	Yes
Complexity:	
Subject:	Utility function for determining if an array is considered numerically indexed

Description

Unfortunately PHP does not offer a reliable way to say whether an array is considered to be numerically indexed or if it's associative.

Not at last this has to come into account with the merge_recursive_overrule function that currently overwrites numerically-indexed arrays instead of merging them finely (but that'll go into another issue ;)
