Has patch:	Yes		
Subject:	f:format.json: Make tag "escaping" default		
Description	<p>Currently, the JSON ViewHelper will put greater-and-lower-than-characters through as they are, which might be dangerous in ViewHelper, ie HTML context.</p>

Revision 3d6a9326 - 2012-08-30 17:38 - Adrian Förder

[FEATURE] Format.JsonViewHelper escapes tag characters per default

Since occurring plain greater-than or less-than characters in HTML context could be dangerous (even CDATA sequences can be stopped with this), the tags are now converted to their hexadecimal representation. Since this is standard JSON syntax, this is considered not to be a breaking change.
