Sprint Focus:			
Subject:	FILES TS Object is not able to deal with comma separated lists for references		
Description			
<p>According to Steffen Ritter, the references property should be able to take in a comma separated list of sys_file_reference UID's (currently not documented, see also http://forge.typo3.org/issues/34137).</p> <p>But the following TS produces an exception:</p> <pre>10 = FILES 10 { references = 188,189 renderObj = TEXT renderObj.data = file:current:publicUrl }</pre> <p>#1316889798: uid of record has to be numeric</p> <p>InvalidArgumentException thrown in file /var/www/vhosts/_SHARED_T3_SRC/6.0.x/typo3_src-git-master/t3lib/file/Repository/FileRepository.php in line 240.</p> <pre>t3lib_file_Repository_FileRepository::findFileReferenceByUid("188,189")</pre> <p>Adding the following TS line resolves the issue:</p> <pre>references.listNum = 0</pre> <p>Btw: As documented, it works for files, e.g.:</p> <pre>10 = FILES 10 { files = 1,2,3 renderObj = TEXT renderObj.data = file:current:publicUrl }</pre> <p>--> Multiple paths to files are outputted.</p>

Revision f3bb439e - 2012-09-18 19:15 - Steffen Ritter

[BUGFIX] TS Object "FILES" is not able to handle multiple references

The current implementation is not able to deal with more than one file-reference (hand over as csv).

According to the documentation and to behave like other options of the FILES object this should be adapted.
