Subject:	Same form twice in one template: hidden fields for empty values are only rendered once		
Description	<p>Noticed this in fluid extension and think this is also relevant for the Fluid package.</p> <p>If you use nearly the same form twice in one template, the hidden fields for empty values are only rendered for the upper form.</p> <p>In Tx_Fluid_ViewHelpers_Form_AbstractFormFieldViewHelper::renderHiddenFieldForEmptyValue the Tx_Fluid_ViewHelpers_FormViewHelper is checked and this also contains the \$hiddenFieldNames of the upper form.</p>
