Affected Flow version:			
Subject:	Default autoloader should handle sub-directories of Classes directory		
Description			
<p>The phpCRJackrabbit package has classes in subdirectories of the Classes directory; in fact the CGL explicitly allow having subdirectories there.</p> <p>The default autoloader <code>autoloadPackageClass(\$className)</code> in <code>source:Packages/Core/Classes/PackageManager/T3P_Core_PackageManager.php#72</code> does not search those, this needs to be implemented.</p>
