TYPO3.Fluid - Feature # 40081

Status:	New	**Priority:**	Should have
Author:	Viktor Livakivskyi	**Category:**	
Created:	2012-08-23	**Assigned To:**	
Updated:	2013-10-02	**Due date:**	
Has patch:	No		
Subject:	Allow assigned variables as keys in arrays		

Description

It was asked couple of times in mailing lists, e.g. here:
http://lists.typo3.org/pipermail/typo3-project-typo3v4mvc/2012-January/011389.html

is something like this possible with fluid?

Controller:

$this->view->assign('value', $value);
$this->view->assign('keyName', $keyName);

View:

arguments="{{keyName} : value, foo: bar}"

IIRC This does not work. Any workarounds?

This is especially needed, when creating links, like index.php?id=5?tx_myext[8][edit]=3, because I need to pass dynamically plugin instance id to GET via 'additionalParams' of 'f:link.page' Fluid viewHelper.
