Subject:	[rsaaauth] Call to undefined method CommandUtility::getCommand()		
Description			
<p>While trying to log in into backend I'm getting:</p> <p>Fatal error: Call to undefined method TYPO3\CMS\Core\Utility\CommandUtility::getCommand() in C:\xampp\htdocs\community46\typo3\sysext\rsaaauth\Classes\Backend\CommandLineBackend.php on line 60</p> <p>this line right now is:</p> <pre>\$this->opensslPath = \TYPO3\CMS\Core\Utility\CommandUtility::getCommand('openssl');</pre> <p>before was:</p> <pre>\$this->opensslPath = t3lib_exec::getCommand('openssl');</pre> <p>Class t3lib_exec is now mapped to \TYPO3\CMS\Core\Extension\ExtensionManager::extPath('core') . 'Classes/Utility/CommandUtility.php';</p> <p>but the content of CommandUtility is completely different then the original t3lib_exec class</p>

[BUGFIX] Merge t3lib_exec class with t3lib_utility_Command

After namespace change both classes t3lib_utility_Command t3lib_exec are mapped to the new class TYPO3\CMS\Core\Utility\CommandUtility

This patch adds missing t3lib_exec content to CommandUtility.

Mapping old classes names to new one is already done for both classes.

seems that both

t3lib_utility_Command and t3lib_exec are pointing to the same file now "Classes/Utility/CommandUtility.php"
