

## Core - Bug # 40195

Task # 40095 (Resolved): Move core to namespaces

<b>Status:</b>	Closed	<b>Priority:</b>	Must have		
<b>Author:</b>	Felix Kopp	<b>Category:</b>			
<b>Created:</b>	2012-08-25	<b>Assigned To:</b>			
<b>Updated:</b>	2012-11-27	<b>Due date:</b>			
<b>TYPO3 Version:</b>	6.0				
<b>PHP Version:</b>					
<b>Complexity:</b>					
<b>Is Regression:</b>					
<b>Sprint Focus:</b>					
<b>Subject:</b>	Namespace: Form: make Filter				
<b>Description</b>					
The filter classes musst be instanciated with the namespace prefix.					
See EXT: form/Classes/Utility/FilterUtility::createFilter.					
Problem is, that the createFilter does not assemble the correct Filter class path with namespace.

Here is the review:

<https://review.typo3.org/#/c/14100/>

This patch only solves the namespacing problems described here.

But there are some more problems with this extension:

```
[Sun Aug 26 00:35:57 2012] [error] [client 192.168.100.21] PHP Fatal error: Call to a member function noWrap() on a non-object in /var/www/typo3_src-git/typo3/sysext/form/Classes/View/Form/Element/ContainerElementView.php on line 58
```

But I'm not as familiar to solve this bug.

Stefan Froemken
