

TYPO3.Fluid - Bug # 4027

Status:	Resolved	Priority:	Should have
Author:	Bastian Waidelich	Category:	ViewHelpers
Created:	2009-07-28	Assigned To:	Bastian Waidelich
Updated:	2010-10-20	Due date:	
Has patch:			
Affected Flow version:			
Subject:	options-argument of the SelectViewHelper should not be optional		
Description			
The SelectViewHelper expects <code>\$this->arguments['options']</code> to be an array. A Select field without options wouldn't make sense anyways. So the options-argument should be required.

Revision 7286ef57 - 2009-07-28 20:26 - Bastian Waidelich

[+FEATURE] Fluid (Core): Added "not equal" Comparator. Now you can use `booleanArgument="{foo} != {bar}"` in your template

[TASK] Fluid (Core): Whitespace- and doc comment tweaks in ViewHelperNode, TagBuilder, EmailViewHelper amd ThenViewHelper

[~TASK] Fluid (ViewHelpers): AbstractFormViewHelper: Renamed method "getObjectValue" to "getPropertyValue". Moved method "addErrorStyleClass" from TextBoxViewHelper up to AbstractFormViewHelper and renamed it to "setErrorClassAttribute". Some cleanups and performance tweaks

[+FEATURE] Fluid (ViewHelpers): AbstractFormViewHelper: Added attribute "errorClass" to form view helpers "Select", "Textarea" and "Upload". They all are able to visualize validation errors now

[~TASK] Fluid (ViewHelpers): ErrorsViewHelper: Replaced "!=" with typesafe comparator "!=="

[+FEATURE] Fluid (ViewHelpers): Added attributes "disabled" to all visual FormViewHelpers

[~BUGFIX] Fluid (ViewHelpers): SelectViewHelper: "options" argument is no longer optional. Fixes #4027

[TASK] Fluid (ViewHelpers): SelectViewHelper: Fixed some documentation typos

[+FEATURE] Fluid (ViewHelpers): Added attribute "disabled" to all visual FormViewHelpers

[TASK] Fluid (ViewHelpers): FormViewHelper: Renamed "uuid" to "identifier" to pave the way for backporting

[~FEATURE] Fluid (ViewHelpers): ForViewHelper: Added more fine-granular support for objects implementing `\Traversable`. If the given array contains no keys or is an object that does not implement the `\Iterator` interface, the key will contain the numerical index, just like in PHPs `foreach`

[TASK] Fluid (ViewHelpers): LayoutViewHelper: Added `isset`-check to `viewHelperArguments` in `postParseEvent()` to avoid PHP notices (mainly to ease creation of unit tests)

[+FEATURE] Fluid (ViewHelpers): Link ActionViewHelper now really supports rendering of absolute URIs. This might be useful e.g. in email templates. See r2868

[~BUGFIX] Fluid (ViewHelpers): Email Uri ViewHelper no longer creates a link tag. This resolves #4028

[~BUGFIX] Fluid (ViewHelpers): External Uri ViewHelper does not extend TagBasedViewHelper but AbstractViewHelper

[+TASK] Fluid: Wrote a lot of test cases, covering all of the ViewHelpers and some of the core classes. More to come!

History

#1 - 2009-07-28 20:09 - Bastian Waidelich

- Subject changed from *option argument of the SelectViewHelper should not be optional* to *options-argument of the SelectViewHelper should not be optional*

#2 - 2009-07-28 21:01 - Bastian Waidelich

- Status changed from *New* to *Resolved*

- % Done changed from *0* to *100*

Applied in changeset r2914.
