Revision 9a18fa95 - 2014-06-16 15:23 - Aske Ertmann

[FEATURE] Placeholder support for inline editable properties

Instead of using a default value to ensure that the editor can
edit the inline editable properties, it's now possible to define
a placeholder text that will be shown if the property is empty.

Example configuration::
    'TYPO3.Neos.NodeTypes:Text':
      properties:
        text:
          type: string
          ui:
            inlineEditable: TRUE
            aloha:
              placeholder: 'Enter text here'

Revision 1343b59c - 2014-06-16 15:24 - Aske Ertmann

[FEATURE] Make title inline editable for chapter pages

As an example of using inline properties directly on the page,
the page title is turned into an inline editable property of
the chapter page. This also demonstrates the placeholder feature.
