Updated:	2012-10-04	**Due date:**	
Subject:	As a content manager, I want to list and edit my Content and Domain Objects inside the Management view		

Description

Definition of done:

- List nodes / domain objects
- Pagination of the list
- configurable Sorting of the list
- configurable filtering or full-text search of the list
- create new domain objects
- delete nodes / domain objects
- edit a single domain object / node
- edit multiple nodes / domain objects
    - change one property in all nodes/domain-objects to the same value
    - change a set of properties in all nodes/domain objects to different values
- use AJAX where appropriate for a smooth user experience
- (maybe) create new nodes

we need a generic listing module which is fully adjustable.
It should have a filter tree on the left, and a right area which contains the actual data. This could be a grid, an item-like list, or ...

Subtasks:

Task # 40711: create TYPO3.Expose on git.typo3.org and migrate TYPO3.Admin from mneuhau...	**Closed**
Task # 40922: Rename TYPO3.Admin to TYPO3.Expose in the code	**Closed**
Task # 41106: style forms to be more usable	**Closed**
Task # 41069: Style "node delete" view of Expose	**Closed**
Task # 40703: style node list such that it matches the general backend look&feel	**Closed**
Task # 41110: disable "table" view	**Closed**
Task # 40704: cleanup: remove obsolete code in the package	**Closed**
Task # 41109: style pagination	**Closed**
