|---|---|---------------------|-------------------|
| Status: | New | Priority: | Could have |
| Author: | Robert Lemke | Category: | Content Rendering |
| Created: | 2012-08-28 | Assigned To: | |
| Updated: | 2013-05-15 | Due date: | |
| Subject: | As a Site Integrator I want to see a list of rendering issues | | |
| Description | | | |
| <p>currently, when "something goes wrong", the inner page in "Backend mode" stays white and when examining the source code, one can see, for example,</p> <pre><!-- Exception while rendering page<TYPO3.TYPO3:Page>/body : Cannot cast object of type "TYPO3\Eel\FlowQuery\FlowQuery" to string. --></pre> <p>I think such happenings should pop through to the user more obviously.</p> | | | |

History

#1 - 2013-05-15 16:20 - Robert Lemke
