

TYPO3.Flow - Bug # 40563

Status:	Closed	Priority:	Should have	
Author:	Adrian Förder	Category:	Security	
Created:	2012-09-03	Assigned To:		
Updated:	2012-09-05	Due date:		
PHP Version:				
Has patch:	No			
Complexity:				
Affected Flow version:	Git 1.2 (master)			
Subject:	When session times out, Exception occurs instead of WebRedirect			
Description				
<p>Obviously when the session times out and one hits /typo3 again, an exception occurs, saying "The context contained no tokens which could be authenticated", instead of silently displaying the WebRedirect target.</p> <p>When hitting the same page subsequently, the behavior is as expected, and the login page appears / the WebRedirect target is displayed.</p> <p>Maybe instead of the Exception some kind of "Session expired!" state should happen.</p>
