Subject:	sysext impexp compat layer files refer to wrong classes

Description

Generating the compat layer files the require once refers to wrong classes folder

Associated revisions

Revision aaa66a60 - 2012-09-05 09:28 - Steffen Ritter

[BUGFIX] Sysext impexp compat layer refers to uppercase class folder

The auto-generated compat layer for the namespace switch

requires the clickmenu classes within the "Classes" folder

while the reside in "classes". This fails on an system with

case sensitive file system.

Change the reference to the correct folder.
