TYPO3.Flow - Bug # 40625

Status:	Closed	**Priority:**	-- undefined --
Author:	Ferdinand Kuhl	**Category:**	Http
Created:	2012-09-04	**Assigned To:**	Robert Lemke
Updated:	2012-09-05	**Due date:**	

PHP Version:	
Has patch:	No
Complexity:	
Affected Flow version: Git 1.2 (master)	
Subject:	InvalidArgumentException thrown in file Headers.php
Description	

The "Set-Cookie" headers must be set via setCookie().
28 TYPO3\FLOW3\Http\Headers::set("Set-Cookie", "JSESSIONID=0000bpxjzMKKBYiEQM5yG5xd5CG:15rk67n7r; Path=/", boolean)

If the foreign webserver sends an header "Set-Cookie" FLOW3 throws an Exception, and breaks header - parsing. So no content from Servers sending cookies can be extracted.
