

TYPO3.Fluid - Bug # 4063

Status:	Resolved	Priority:	Must have
Author:	Christian Zenker	Category:	
Created:	2009-07-29	Assigned To:	Bastian Waidelich
Updated:	2010-10-20	Due date:	
Has patch:			
Affected Flow version:			
Subject:	CObjectViewHelper erases field data in TypoScript		
Description			
<p>If no cObj is handed, CObjectViewHelper uses cObj from the GLOBALS-array. But this way it erases all data in this cObj that might be used later on in TypoScript.</p> <p>Example</p> <pre>page { 10 < plugin.tx_myext headerData = TEXT headerData { # will be empty field = title wrap = <title> </title> } }</pre>			
<p>The appended bugfix creates a new cObj if none is supported, but I'm not sure, if this is the best solution. Maybe the parser could support one, or maybe it already does...?</p>			

History

#1 - 2009-07-30 15:30 - Christian Zenker

Tx_Fluid_ViewHelpers_Format_CropViewHelper uses \$GLOBALS['TSFE']->cObj, too.

#2 - 2009-08-06 01:06 - Jochen Rau

- Assigned To set to Sebastian Kurfuerst

#3 - 2009-08-06 08:32 - Sebastian Kurfuerst

- Assigned To changed from Sebastian Kurfuerst to Bastian Waidelich

Bastian, can you take care of this issue?

#4 - 2009-08-09 22:01 - Bastian Waidelich

- Status changed from New to Resolved

- % Done changed from 0 to 100

Applied in changeset r1084.

#5 - 2009-10-21 17:52 - Bastian Waidelich

- *Project changed from Extbase MVC Framework to TYPO3.Fluid*

- *Category deleted (432)*
