Subject:	Javascript error in backend

Description

Hi,

I just tried Typo3 6.0.0Beta1 and got a problem when I wanted to edit the default admin user using the Module "Backend users".

I figured out, that a Javascript error occurs. The error comes from the saltedpasswords-Extension Version 1.1.0.
In ext_tables.sql, new eval-Validators are set for the be_users Password field. One of the Validators is
TYPO3\\CMS\\Saltedpasswords\\Evaluation\\BackendEvaluator (Line 26).
In */typo3/sysext/backend/Classes/Form/FormEngine.php* Line 1335, the Validator-Names are used to create a Javascript-Function.
But *TYPO3\CMS\Saltedpasswords\Evaluation\BackendEvaluator* is not a valid Javascript Function.

This has to be fixed please, because I can't edit or create new backend users with the saltedpasswords-Extension.

- Status changed from New to Needs Feedback

- Assigned To set to Francois Suter

- Target version set to 6.0.0-beta2

This was solved already in current master with issue #40561. Can you confirm that it solves the issue for you?

#3 - 2012-09-07 18:36 - Tim Schreiner

Hi,

the current master worked for me.
Sorry for that, I must have overseen that issue.

No problem. Great that it works again for you too.
