[FEATURE] Refactor, fix and improve image handling

This change implements reworked, cleaned up and fixed image handling.

NOTE: If you add an image content element and directly want to modify it,
    the "apply" button does not activate. This is a bug in adding of nodes,
    as described in #40860. This will be fixed lateron. As a workaround,
    you should reload the backend after adding a new image content element.

It contains the following detail-improvements:

  - Uploading images works correctly
  - Cropping images works
  - Setting width and height works as expected
  - saving works
  - loading existing images works
  - We now consistently use "w" and "h" for width and height, in
      sync with jCrop
  - updated jCrop
  - various detail bugfixes
  - code cleanup and restructuring
  - When selecting an already-existing image, a loading indicator
      is shown while image metadata is fetched.
  - The server side ContentController is cleaned up, containing only
      the methods which are still used.

Resolves: #40691

Change-Id: Id640f0ce45fc4145336c66fe18823299f866b46b
