

Core - Bug # 40814

Task # 40095 (Resolved): Move core to namespaces

Status:	Rejected	Priority:	Should have
Author:	Mario Rimann	Category:	FormEngine aka TCEforms
Created:	2012-09-11	Assigned To:	
Updated:	2012-10-10	Due date:	
TYPO3 Version:	6.0		
PHP Version:	5.3		
Complexity:			
Is Regression:			
Sprint Focus:			
Subject:	Exception in TCA tree after Namespace changes (part 2)		
Description			
Same problem as with #40795 - but that change was merged before I could give a feedback during the review.			
The message of the exception changed a bit after the change introduced with #40795:			
<div>#1: PHP Catchable Fatal Error: Argument 1 passed to TYPO3\CMS\Backend\Tree\AbstractTree::setNodeRenderer() must be an instance of TYPO3\CMS\Backend\Tree\Renderer\AbstractTree, instance of TYPO3\CMS\Core\Tree\TableConfiguration\ExtJsArrayTreeRenderer given, called in /path/to/typo3_src/typo3/sysext/backend/Classes/Form/Element/TreeElement.php on line 91 and defined in /path/to/typo3_src/typo3/sysext/backend/Classes/Tree/AbstractTree.php line 71</div>			
Steps to reproduce:			
<div>- Install EXT:news (as it makes use of the tcatree-feature) - Go to List module - Add a record of type "News Category"</div>			
Expected:			
<div>- Form for creating a News Category is shown</div>			
Current:			
<div>- the above mentioned Exception is shown</div>			

History

#1 - 2012-09-25 20:52 - Helmut Hummel

- Parent task set to #40095

#2 - 2012-09-26 19:06 - Wouter Wolters

Mario: AFAIK this is already fixed in master. Can you verify if the problem is solved?

#3 - 2012-10-04 08:45 - Mario Rimann

Just verified: You're right, problem is solved on a clean master with current tx_news version.

#4 - 2012-10-10 12:55 - Steffen Ritter

- Status changed from New to Rejected

no fix needed anymore
