<b>Subject:</b>	Form shows Fatal Error in Frontend				
<b>Description</b>					
<p>The changes from #40364 that were merged yesterday fixed the Form Wizard in the Backend. But the Frontend now throws the following Fatal Error:</p> <p>Fatal error: Class '\TYPO3\CMS\Form\Footer\RemovexssFilter' not found in /path/to/typo3/sysext/core/Classes/Utility/GeneralUtility.php on line 4154</p>

[BUGFIX] Form shows Fatal Error in Frontend

This resolves the wrong instantiation of all classes that contain uppercase characters within a certain class name part, by adding the lowercased versions to the class alias map.

Fixes: #40850

Releases: 6.0

Can't reproduce it with current master. Can you post how to reproduce it? What is the form configuration you use?

It's still the same configuration that we used when we reported #40825 (configuration is attached as .txt file to that bug report).

To reproduce, just open that page with the form CE in the Frontend and see the Fatal Error.

**#3 - 2012-09-15 08:15 - Jigal van Hemert**

Tested your form from #40825 with current master on Windows and the form was displayed without any errors or flaws. Submitting an empty form showed the error messages for the three mandatory fields.

Seems OS X specific problem?

No. The error appears also using Debian squeeze. I installed the Introduction Package (Beta2, after fixing #41084 with patch provided in #41245). Then navigating to examples/forms/ shows this error.

PHP 5.3.3-7+squeeze14 with Suhosin-Patch (cli) (built: Aug 6 2012 20:08:59)

Can confirm this error with clean caches on a SLES box with 6.0.0beta2
