<b>Subject:</b>	Missing jquery.notice.js stops Backend from Working		
<b>Description</b>			
<p>Hi;</p> <p>I noticed a missing piece of JavaScript in current master.</p> <p>RequireJS tries to get jquery.notice.js; but this is not existent. In Chrome 23, this stops the Backend from initializing correct.</p> <p>Fix:</p> <p>Get the file from [<a href="http://code.google.com/p/jquery-notice/source/browse/trunk/jquery.notice.js">http://code.google.com/p/jquery-notice/source/browse/trunk/jquery.notice.js</a>] and put it in the TYPO3.TYPO3 Resources / Public / JavaScript folder..</p> <p>It would be great, if you could fix this fast, as it is a fairly simple one.</p> <p>Maybe there was a reason for removing it?</p>
