

TYPO3.Flow - Bug # 40888

Status:	Resolved	Priority:	Should have
Author:	Karsten Dambekalns	Category:	MVC
Created:	2012-09-13	Assigned To:	Bastian Waidelich
Updated:	2012-12-11	Due date:	
PHP Version:			
Has patch:	No		
Complexity:			
Affected Flow version: Git 1.2 (master)			
Subject:	Add ViewNotFoundException		
Description			
As noted in a comment on https://review.typo3.org/14439 we should not use NotFoundView ourselves anymore. Thus it seems we should add a ViewNotFoundException exception to handle that case.

Revision 9f99c840 - 2012-12-10 17:26 - Bastian Waidelich

[BUGFIX] Throw ViewNotFoundException if view could not be resolved

This improves the resolving of views by removing the canRender() checks from ActionController::resolveView as discussed in #42176.

Besides this skips the creation of the obsolete NotFoundView in favor of throwing a ViewNotFoundException.

This also adds overdue unit tests for the ActionController.

Revision 6f03a9a4 - 2012-12-12 15:56 - Bastian Waidelich

[TASK] Remove API annotation from View::canRender()

With #40888 View::canRender() is no longer called from within ActionController::resolveView().

As the framework no longer relies on that method to exist the @api annotation is removed.

Besides this marks EmptyView deprecated.

Unfortunately this is not as easy as it seemed..

If we throw an exception, one can't ignore the template and return content directly from an action.

This should be resolved with #42176 though.
