Affected Flow version:	
Subject:	F3\FLOW3\Utility\Files::getUnixStylePath() creates invalid paths on windows

Description

C:\h\flow3\intranet\Web

becomes

C://h/flow3/intranet/Web/

Windows doesn't like the // and fails to create directories later.

This is a major bug that will kill FLOW3 on Windows with a fatal error.

I'm not sure wheter \F3\FLOW3\Utility\Files::getUnixStylePath() should replaced double slashes at all.. If I provide a path with wrong slashes like "/var/www//foo/" the path is probably invalid anyways..

Attached is a patch that simply skips the replacement of "//" to "/".
