[TASK] Merge ext:integrity with ext:lowlevel

System extension integrity was created with the namespace switch and
contains the cli classes from ext:lowlevel. It turns out that this
change was not so useful, so for now the cli classes are moved back
to ext:lowlevel.

[BUGFIX] Register suite integrity tests again

The integrity unit tests executed at the very bottom of the
test suite very accidentally removed during issue #40950.
Add them again.

@Helmut: This means, that the new system extension (created during namespace conversions) will be removed again and the code will be in
lowlevel, correct?
