[BUGFIX] Debugger now respects possible occurrence of Closures

A trial `isset()` call for a property of a Closure resulted in a PHP error saying "Closure objects cannot have properties". To avoid this, the `isset()` statement has been replaced with a `property_exists()`.

This is considered slower than `isset()`, like claimed in a User Contributed Note [1], but obviously the only workaround for these cases [2]. And speed is not an issue when the debugger is used...
