Has patch:	No		
Complexity:			
Affected Flow version:	Git master		
Subject:	Converting of ValueObjects		
Description			
<p>having a Model "Category" as a valueObject and want to display Articles having this Category assigned the mapping fails with Creation not allowed exception.</p> <p>Uri looks like this: listarticlesbycategory?category[__identity]=1ffb48f0cda7a90ace1f460d7bcc387a7274a777</p> <p>f.e.: listArticlesByCategory(\Vendor\Package\Domain\Model\Category \$category)</p> <p>think this is a bug in PersistentObjectConverter. This unsets the __identifier so its recognized as a new one.</p>
