[BUGFIX] Show content element handles for nested content elements

[BUGFIX] fix non-editable overlay behavior

This change fixes the behavior of the non-editable overlay with the following detail changes:

- the "hover" state now works consistently with the content element outlines
- the "hover" state now works with nested content elements
- the overlay is not shown for elements with sub-content (like a two-column element)
- the size of the overlay is recalculated if its contents change
