Core - Bug # 41249

Status:	Closed	**Priority:**	Must have
Author:	Georg Ringer	**Category:**	
Created:	2012-09-22	**Assigned To:**	
Updated:	2013-05-10	**Due date:**	

TYPO3 Version:	6.0
PHP Version:	
Complexity:	
Is Regression:	
Sprint Focus:	

Subject:	tsconfig_help currently broken because of em

Description

current code of tsconfig_help is

```
        if (!\TYPO3\CMS\Core\Extension\ExtensionManager::isLoaded('em')) {
            // Em is not loaded, so include the unzip class
            \TYPO3\CMS\Core\Utility\GeneralUtility::requireOnce(PATH_typo3 .
    'sysext/em/classes/tools/class.tx_em_tools_unzip.php');
        }
        $unzip = \TYPO3\CMS\Core\Utility\GeneralUtility::makeInstance('tx_em_Tools_Unzip', $file);
        $ret = $unzip->extract(array('add_path' => $path));
        return is_array($ret);
```

ext is no "extensionmamanager" and unzip is not there anymore
