<b>PHP Version:</b>			
<b>Has patch:</b>	Yes		
<b>Complexity:</b>	easy		
<b>Subject:</b>	Allow class/interface constants in configuration directives		
<b>Description</b>			
currently, only "raw" plain PHP constants can be used in YAML files, like %FLOW3_PATH_FLOW3%. IMHO nothing speaks against allowing class constants to be used here, too.

[FEATURE] Allow class constants in Configuration

Currently, only plain PHP constants are allowed for substitution in Configuration files. This changes the regular expression in order to match class constants too.

So not only ``%PHP\_VERSION%`` would be possible, but also, for example, ``%TYPO3\FLOW3\Core\Bootstrap::MINIMUM\_PHP\_VERSION%``.
