Updated:	2010-10-20	Due date:	

PHP Version:	
Has patch:	
Complexity:	
Affected Flow version:	
Subject:	MVC Controller Argument $dataType should NOT be set to "Text" by default

Description

MVC Controller Argument $dataType should NOT be set to "Text" by default. Instead, it would be a lot better to throw an exception if the data type could not be determined.

Just imagine somebody writing the following:

    * param array $bla

He will only notice that he forgot the @ if the system throws an exception at him. Else, it could sometimes work, and sometimes not...

Greets,
Sebastian

History

#1 - 2009-09-21 22:49 - Karsten Dambekalns

- Category set to MVC

- Status changed from New to Resolved

- Assigned To set to Sebastian Kurfuerst

- Target version set to 1.0 alpha 5

This is fixed as of r3192.
